build for *Life*

About Hi-Tech Steel

Hi-Tech Steel specializes in niche, premium and bespoke Eu
We provide the most innovative products with the highest me

Our products are lightweight with excellent resistance, providing guaranteed characteristics, coupled with pliability, capable of meeting the standards of daring and innovative projects.

Hi-Tech Steel is about more than steel technology.
It's a unified, innovative service, provided to architects and engineers
– a broad range of alternatives for project implementation.

We handle the entire process of project administration:
the supply of steel; engineering; procurement; manufacturing; assembly; and the delivery
of pre-fabricated modules.

We present solutions established and approved in the Europe market. See how.

contact@Hi-Tech-Steel.com

Our Solutions

 We supply steel products; pre-fabricated modules for projects and complete turn-key solutions for construction.

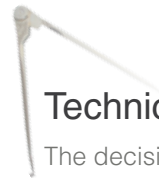

Price Hedging

With extensive know-how and expertise in the secondary markets; we create robust cost savings and develop price protection strategies.

We seek every alternative supply option to attain this objective, and we ensure added value for your organization, utilizing a systematic and dynamic approach distinct from that used by traditional suppliers.

We propose a partnership option, whereby we support your projects, helping to realize the plan.

This combined work method presents a mutual benefit, a strategic relationship that brings forth an enhanced performance for your projects.

Technical Support

The decision to outsource technical advisory services opens up many doors, so your businesses enjoy a wide availability of services, allowing your company to remain focused on the execution of critical project elements.

Experienced manufacturers have much to contribute to, our clients benefit from the experience we gain serving our global partners. We provide technical support services, helping to solve specific product problems, without you having the need for constant training, customization or the provision of other costly support services. We offer optimization and cost reduction.

The elaboration of custom-made strategies is the core of our business; we are always attentive to the needs and expectations of our clients. We offer options for the basis of protocol decisions, and provide solutions in response to market changes. What we offer is the highest quality customer service.

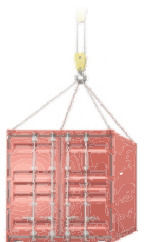

Fixed Prices

↳ *throughout your project*

We are able to set fixed prices for both products and for services, shielding your company from much of the market's turbulence. We understand how market turbulence can erode your profit margins, and compromise the economic and financial balance of the otherwise viable contracts.

Our price agreements are contracts between parties on the same side of the business - buying or selling a product, a service or a commodity.

This is a key element in planning strategy in increasingly competitive markets and operating under complex conditions.

Logistics

In the field of logistics, we reduce your corporate costs, improving the quality of customer service, and increasing sync activities throughout the supply chain. With materials management and information services, your capital flows!

Using a custom audit and tools with the ability to analyze costs, we will identify opportunities that generate savings in your logistic services, warehousing, export refunds scheme, free circulation and drawback system.

Financing and Credit Insurance

↳ *to build your business!*

Your firm will win tenders and new projects by expanding its trade financing solutions.

With the current decline in demand for industrial and civil construction, banks reduced their exposure to the steel and construction sectors, withdrawing more and more services and credit lines as fiscal austerity limits national projects.

Nevertheless, we continue to have positive access to banking finance for projects with prudent risk levels -- a service we offer to clients used to working with bank credit lines, and credit insurance.

Today, we offer a service which resembles a banking relationship. Open up an account with us!

Support for EPCs

↳ *a one-stop-shop solution*

EPC contracts have optimized the execution of industrial projects. Contractors have become a single point of accountability, taking on greater liabilities and offering greater cost / benefit and early handover of projects.

For the project owner, turnkey contracts are the best solution. The liability and the majority of the risks of the project are borne by supplier.

Monitoring of Processes

We render assistance in the elaboration of reports and definition of processes, which ensures that successful companies quickly identify shortcomings and adjust specific tasks of the employee capabilities.

Today, we provide dashboard monitoring, displaying productivity, combined with various logistical, financial and administrative activities.

Our Fields of Expertise

Infrastructure – Water, Roads, Railways

For decades we have been engaged in the construction of bridges, roads and public transport interfaces in Europe, gaining solid expertise in these areas. We provide the products and services essential for the maintenance and improvement of public health, and for urban and environmental development of modern cities.

Power – Transmission, Distribution, Renewable

Our projects range from the distribution of energy resources to power generation, connecting energies of various origins. Modern societies increasingly depend on a reliable supply of high quality energy. We face traditional challenges as well as those emerging in onshore and offshore electric power systems. We specialize in the distribution and integration of renewable energies. We operate in energy conversion, power electronic systems and submarine cables.

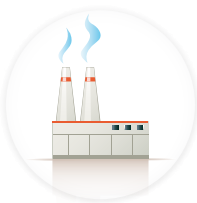

Oil products - Storage & Distribution

We provide the latest technology in the storage and distribution of petroleum products. We support your project every step of the way, providing raw materials and prefabricated solutions for construction of tanks and oil pipelines. We ship our products safely and you can choose local constructors or our preferred partners, for assembly and construction.

Gas – Storage & Distribution, LNG

Liquefied Natural Gas is the main storage form of natural gas above ground. A significant amount of natural gas resources worldwide are considered "stranded" because they are located far from accessible markets. Therefore, LNG is often internationally carried in vessels specially built for this purpose. Operations with the gas involve the construction of tanks, installations, gas pipelines and ships. We stand ready to be your partner in the market of natural gas export.

Industry Projects

Our 'Project Area' provides an overview of projects already undertaken, current and future, giving us a snapshot of the panorama of a changing market. We have been involved in projects in power cogeneration, refinery, recycling ... Meet our skilled team and find out more about our project experience.

Contact Us

We find tailored solutions for each location because we understand that all markets are different, complex and challenging.

We are continually active in Africa, Europe, Middle East and South America.
